For The BCCCS, without industry standards in testing, the cost of testing for safe and clean medicine outweighs the benefit of testing cannabinoid profiles for our membership at this time.

We test for cleanliness: mold, mildew, pesticides, herbicides, coliform, heavy metals.

Wherever possible as provided by the grower, producer or trusted cannabinoid testing laboratory, we will print current available cannabinoid profiles for our medicines.

Please note that even under optimal conditions, testing for THC & CBD profile remains inaccurate, inconsistent and as of yet not legally standardized.

Margins of difference can range from +/- 15-20 percentage points between testing laboratories.

Note: We can accept only cash as payment.

*For large Pre-Roll orders, please call in advance*

Created by our Herbalists for relief of sore muscles & joints and has come to the rescue for so much more!

**SUBLINGUAL OR TOPICAL**

The following medicines are highly concentrated whole-plant extractions best suited to be used sublingually or topically.

THC: Delta9-Tetrahydrocannabinol, first isolated in 1964 has been studied internationally for over 50 years. It has been found to be a neuroprotective anti-oxidant, and holds anti-itch, anti-inflammatory, anti-emetic, muscle-relaxing, pain relieving, and bronchodilatory properties.

CBD: Cannabidiol, positively identified in 1963, has also been found to be a neuroprotective anti-oxidant that improves cognition with anti-convulsant, anti-spasmodic, anti-emetic, anti-inflammatory and regulator in coronary circulation.

**BCCCS COMPASSION OIL (High THC)**

Our healthy alternative of 'Phoenix Tears'.

Best taken sublingually or topically.
Organic, naturally occurring high THC, whole-plant extraction using medical food grade alcohol produces a dark, resinous concentrated oil.
Fast and effective for pain relief. Often used for chemotherapy symptoms relief.
Available in up to 2g in a Refillable Patron dispenser has accurate dosage of 0.01g of medicine per click.
Special orders available upon request:
Up to 5g in a refillable Patron dispenser
Up to 2g in a silicone lined, hard plastic twist top
Up to 2g in a glass jar with a silicone lid
OR specific doses of Compassion Oil Suppositories

$1g Vial (twist or cork top) $20.00
OR syringe/plunger

2g Patron dispenser $48.75

**CONCENTRATED OIL EXTRACTIONS (for Smoking or Vaping)**

Cannabis concentrates such as our Dark Amber Oil, Shhhhhh Pre-Filled Vaporizer Pens, Hash Oil Extractions aka Budder/Crumble/Dabs/Resin/Resin/Shatter/Wax/etc are best administered via smoking with a specialized pipe or bong and/or the use of a vaporizer specifically designed to make use of these products. These products should never be eaten. The aforementioned products are all extremely potent and are ideally to be used by those individuals who have a demonstrated high tolerance to Cannabis and/or who are experiencing an immense amount of pain.

**DARK AMBER OIL**

From the same producer as our previously stocked Honey Oil

Dark amber colour, smooth taste. Effective pain and nausea relief. Alcohol extracted & filtered.

- 5 capsule pack $15.00

---

**SIMPLE INFUSIONS**

On a biochemical level, cannabis binds best to fats, sugars and alcohols -- all suitable mediums for the body to process the chemical compounds, cannabinoids, infused in these mediums.

The effects of ingested cannabis may be felt within the first 30 minutes to 2 hours (wait longer on a full stomach) and may last for 2-8 hours.

Effects from edibles vary depending on strain & preparation, and are generally more sedative and considerably more psychoactive.

Due to strength, cannabis preparations should be eaten by starting with a small bite, waiting an hour and increasing the dose gradually throughout the day as needed.

Special orders by quantity for any infusion available upon request.

---

**BUTTER**

SATIVA or INDICA or CROSS

Highly concentrated. Recommended to blend with 3/4 cup to 1-3/4 cup regular butter to meet most recipes that call for 1-2 cups of butter. Please inquire for cooking suggestions.

- 1/4 cup (60ml) $16.50

---

---

**COCONUT OIL**

Decarboxylated CROSS or INDICA in organic cold-pressed extra virgin coconut oil

Beginner’s dosage = 5mL

- 100 mL $21.00
### TINCTURES

Made with whole-plant medicines & steeped for weeks, our alcohol and glycerite tinctures have been a staple to the BCCCS menu since the beginning!

**Our regular & extra-strength tinctures are available in 25mL or 100mL bottles and infused in either a high-proof, food-grade alcohol, or a vegetable glycerite.**

- **Dose low, go slow.** Begin with 1-5 drops under the tongue, gargle/swish for 20-30 seconds to absorb to bloodstream via the capillaries in the mouth before swallowing.
- **Allow 45 mins to pass before considering an additional dosage of 1-3 drops.**
- **Effects may last up to 8 hours.**
- Alternatively, drop medicine into a drink, such as in tea, juice, or water for flavor and easy swishing. The effect is similar to smoked cannabis, however, the onset may take about 30 minutes.

**Recommended for precision:** After withdrawing the dropper from the bottle, deposit the first drop back into the bottle as it will be slightly bigger than subsequent drops due to residual medicine on the outside of the dropper and therefore it will be of unknown dosage.

### SUPPOSITORIES

- A safe, fast, and highly bioavailable alternative to oral ingestion
- Metabolises faster, with less psychoactive effects than oral or inhaled
- Easier to administer in palliative, hospital or home environments
- Made with our clean, tested HIGH CBD Oil blended with soothing cocoa butter

Special orders by quantity or dosage for BCCCS High CBD Oil suppositories available upon request.

**DIRECTIONS**

Keep refrigerated until prepared and in position to insert before unwrapping the medicine. Handling too long will result in it melting.

1. After washing & drying hands, lie on your side or back and then remove suppository from wrapper.
2. Gently insert the suppository pointed tip first into the rectum, just past the muscular sphincter; about 1/2 inch for a child or 1 inch for an adult.
3. Stay laid down for a few minutes, you should feel little or no discomfort while holding it in.

There is normal potential for leaking if mobile shortly afterward.

Expect initial effects in 10 minutes with a duration of 4-8 hours.

### High CBD Oil Suppositories

Contains 0.1g of our High CBD Oil blended between soothing organic cocoa butter.
