

Dear Potential Member:

Please find enclosed:

- A letter to your Physician or Nurse Practitioner
- Medical information for You and your Health Care Practitioner
- A Health Care Practitioner's Statement Form

In order to become a member of the British Columbia Compassion Club Society, we require a recommendation by your Physician or Nurse Practitioner on the attached Practitioner Statement Form which needs to be faxed to us at 604-875-6083 directly from their office.

While many health practitioners are recognizing the effectiveness of cannabis as a medicine, some may feel that they do not have enough knowledge about this plant medicine. Please encourage them to fill out the Practitioner's Form and inform them that the British Columbia Compassion Club Society (BCCCS) has 23 years of experience and knowledgeable staff to provide advice about the most appropriate product for the specific health condition or symptoms, and guidelines on responsible and effective dosing. The BCCCS has also applied to Health Canada for a Medical Licence Application and are awaiting the results.

The following list of health conditions and symptoms are those for which research has shown cannabis to be effective. We also have a data base of approximately 14,000 members who over the years have reported benefits from the use of medical cannabis. Once we have received and confirmed your paperwork, you will be added to our Waitlist for a one-hour New Member Orientation. If your condition is critical or palliative, your health care practitioner can check the fast track request box on the Form and we will try to book your Orientation as soon as possible. If you have questions, please contact us for further information at 604-875-0448 or check our website at www.thecompassionclub.org.

Thank you, the Staff of the BCCCS

ADHD	Digestive Issues	Multiple Sclerosis
ALS	Epilepsy	Nausea
Anxiety	Fibromyalgia	Neurodegenerative Disorders
